Betsy:

Please see attached updated schedule from RSA reflecting the 7/31 start date and including the gamma walk-over survey of the area surrounding the pad.

**Importance:** High

Betsy -

Sure – We (our consultant RSA) plan to initiate survey mobilization activity tomorrow (7/31). The survey is expected to run for approximately 18 consecutive working days (weather permitting). I also just spoke to Paul Steinmeyer of RSA and he wanted me to tell you that if there is any portion of the planned activity you prefer to witness that he and his staff will do all possible to work it so those activities are being performed when you can be present. So just let us know via reply to all when you can and we will plan for that.

Please see attached schedule – Please note that 7/31 will be the initial mobilization date and not 7/25.

Thank you,

Dave

Do you have a more specific schedule regarding what parts of the survey you plan to do, on which days? I need that information if we are to get anyone to your location to inspect.

Thanks,  
Betsy
