**U.S. Nuclear Regulatory**  
**Commission**

Dear Madame,

Let me take a pleasure in providing you with the latest Annual Report of the Activities of the President of National Atomic Energy Agency and Assessment of Nuclear Safety and Radiological Protection in Poland in 2011.

This year Report of the NAEA President contains a number of interesting issues connected with the activities of the National Atomic Energy Agency: it presents the assessment of status of nuclear safety and radiological protection in Poland, it also contains information concerning recent changes in the organizational structure of our regulatory body and discusses in a comprehensive manner the scope of activities of the NAEA. Furthermore, it presents the newest legislative works and other activities within the Polish Nuclear Power Program, and, last but not least, describes the development of the NAEA and its plans for the future. You may find this and other detailed information in this year Report of the NAEA President which I would sincerely encourage you to read.

Please accept my best wishes for the New Year.

With kind regards,

A handwritten signature in blue ink, appearing to read 'J. Włodarski', with a long vertical line extending downwards from the end of the signature.
