**To:** NRCExecSec Resource  
**Subject:** radionuclide filters

Sirs:

I urge you, as strongly as I can, to adopt the nearly universal and obviously safest policy of requiring that when containment vents are opened in case of an accident, the released effluent passes through a high-capacity filter. It seems like a no-brainer to follow such a common-sense safety measure, despite the industry's resistance based solely on additional cost.

Sincerely yours,

Robert R. Holt, Ph.D.
