RE: Venting Systems for Mark I and Mark II Containment

Dear NRC Commissioners,

I live in Marshfield, MA, 20 miles from the Pilgrim Nuclear Power Station. I am writing to ask you to vote "yes" on your technical staff's recommendation to require all operators of GE Mark I and Mark II reactors in the United States to install high capacity radiation filters on their containment vents.

The Pilgrim Nuclear Power Station in Plymouth, MA has a GE Mark I reactor that is unfiltered. If there were a severe accident at Pilgrim, my community and many others in the Greater Boston area would be exposed to a release of radiation exponentially greater than if a filter were installed.

I urge you to think of people like me and my family when it comes to protecting us with what seems to be a relatively easy and relatively inexpensive "fix."

Thank you,  
Anna Baker  
1009 Union Street  
Marshfield, MA 02050
