I urge you, the - all the Commissioners of the Nuclear Regulatory Commission, to vote YES to the NRC staff's post-Fukushima recommendation to require engineered radiation filters on hardened containment vents at all 31 GE Mark I and Mark II nuclear reactors in the U.S. To not do so will immediately affirm the deep distrust of NRC decisions that the public already holds. The public knows that the Fukushima tragedy is on-going living proof that Mark I containments are, as the whistle blower GE engineers years ago said they would be - tragic failures. Your first duty is to make sure the public is protected from radiation catastrophies - not to protect industry from its gross failures.
