Re: Worcester Polytechnic Institute Reactor, USNRC license R-61, Docket 50-134; Final Status Survey Plan

Dear Sir:

The enclosed Final Status Survey (FSS) Plan (hard copy) fulfills WPI's commitment to develop and submit a FSS Plan for NRC approval, as described in "Proposed Final Status Survey Plan" (Chapter 4.0) of the September 2009 Decommissioning Plan. This Plan has been prepared using project-specific information, relative to post-remediation facility conditions and known characteristics of potential residual radiological contaminants. Further, this FSS plan was prepared using the guidelines and recommendation presented in NUREG-1757, Consolidated NMSS Decommissioning Guidance, and NUREG-1575, Multi-Agency Radiation Survey and Site Investigation Manual (MARSSIM).

If you have any technical questions or comments regarding the FSS Plan, or require an electronic version of the plan, please contact Jay Adler at TLG Services, Inc., at 860-355-2300 or (adler@tlgservices.com).

I certify under penalty of perjury that the foregoing is true and correct to the best of our knowledge. Executed on January 18, 2013.

Sincerely,

Michael J. Curley
Reactor Director
University Compliance Officer
Finance and Operations
