DRAFT SUMMARY OF INFORMATION COLLECTION REQUEST

Title: Reactor Oversight Process External Survey (3150-XXXX)

Current Burden/Responses: 0 hours/0 responses

Proposed Burden/Responses: 13.3 hours/13.3 responses

Burden Attributable to Third Party Collections: n/a

Frequency of Response: Biannually

Number of Respondents: 13.3

Reasons for Changes in Burden/Responses:

Level of Concurrence: Branch Chief, Performance Assessment Branch
Division of Inspection and Regional Support
Office of Nuclear Reactor Regulation

Recordkeeping Requirements in Accordance with the Retention Periods for Records Rule
There are no recordkeeping requirements.

Abstract:

The mission of the NRC is to regulate the nation's civilian use of byproduct, source, and special nuclear materials to ensure adequate protection of public health and safety, to promote the common defense and security, and to protect the environment. One way to support this mission is through the implementation of the Reactor Oversight Process (ROP), which is the agency's program to inspect, measure, and assess the safety performance of commercial nuclear power plants and to respond to any decline in performance.

The NRC seeks to achieve continuous improvement of the ROP through the ROP self-assessment process. The CY 2013 and 2015 ROP self-assessments will rely, in part, on direct feedback from external stakeholders. The information collected through the voluntary survey will support this purpose, and a summary of the survey results will be included in the annual ROP self-assessment report to the Commission.
