Re: License # 21-26281-02

Dear Mr. Reichhold:

I received your request for more information regarding the change of name on our license. I am requesting that we change West Michigan Testing to "doing business" as Nordlund & Associates, Inc.

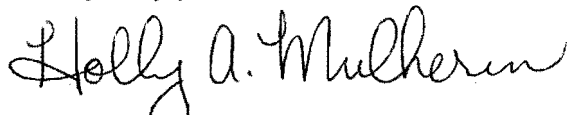

In 2009 the ownership of West Michigan Testing, Inc. and Nordlund & Associates, Inc. became the same, at this time the Corporation was dissolved and the employees of West Michigan Testing became employees of Nordlund & Associates, Inc. West Michigan Testing has kept its logo and name-recognition as a soils construction firm. All employees and procedures have remained the same.

We are adding only the four existing Seaman Nuclear Density gauges to the Troxler gauge that we already own, however we would like to increase our limit in order to add another Troxler gauge if needed. The new Troxler gauge, if needed would be in the 3400 series (the same as the one we have) the source for these Troxler gauges is Cesium-137 at a not to exceed amount of 9 millicuries and Americium-241 at a not to exceed amount of 44 millicuries.

Therefore we would like our total possession limit to be 18 millicuries of radium226/beryllium for the four Seaman gauges and 18 millicuries of Cesium-137/88 millicuries of Americium-241 for two Troxler gauges (one that we own and a spare if we need to rent one or purchase another).

Please do not hesitate to contact us if you have any questions, or need further information.

Very truly yours,

Holly A. Mulherin, P.E.  
President
