MEMORANDUM TO: Patricia Silva, Chief
Conversion, Deconversion and
MOX Branch
Division of Fuel Cycle Safety
and Safeguards
Office of Nuclear Material Safety
and Safeguards

FROM: Breeda Reilly, Senior Project Manager /RA/
Conversion, Deconversion and
MOX Branch
Division of Fuel Cycle Safety
and Safeguards
Office of Nuclear Material Safety
and Safeguards

SUBJECT: FEBRUARY 13, 2013, CONFERENCE CALL SUMMARY TO
DISCUSS SEISMIC PROJECT STATUS, HONEYWELL
METROPOLIS WORKS (TAC NO. L32788)

On February 13, 2013, the U.S. Nuclear Regulatory Commission (NRC) staff and representatives of Honeywell Metropolis Works held a telephone conference to discuss seismic project status. The purpose of the call was to discuss project status and path forward on the review. Honeywell staff did not have any questions for the NRC staff regarding the public meeting held the week before. They also clarified that by mid March they will share the preliminary results of the safety margin and by early next week they should be more than halfway done on the release of Uranium Hexafluoride calculations.

The NRC staff and Honeywell then engaged in a conversation about the next meeting. It was proposed that it is to be scheduled Tuesday, February 19, 2013. The discussion will be centered around the safety margin.

No staff decisions were made at this meeting.

Enclosure 1 provides a list of those who participated in the telephone conference.

Docket No. 40-3392
License No. SUB-526

Enclosure: As stated
