**Subject:** Ross License Condition 12.11

Mike,

I wanted to let you know that I had to change license condition 12.11 in order to get OGC concurrence on part of the safety evaluation report.

The change is adding D and E:

12.11 Prior to the preoperational inspection, the licensee will provide to the NRC written standard operational procedures (SOPs) required for LC 10.4, which will include information to meet the following specific-site conditions:

- A) Development and sampling of low-yielding monitoring wells.
- B) Inspection procedures for the CPP dewatering system.
- C) A CPP effluent and environmental monitoring program (if not incorporated into the groundwater detection monitoring program required by LC 10.20).
- D) An emergency response program that includes hazard assessment of all chemicals used at the facility including an accident analysis for those chemicals.
- E) Transportation of licensed material outside of the License area.

This change should be included in your current evaluation of the license conditions.

Feel free to call 301-415-0697

John
