Jeff..... try using the appeal panel's one pager timeline as a starting point. I recall there was one in the report that gave the basic interactions and we can update from then forward.....

FYI

Please keep this in mind when developing the bullets and coordinating with Region. Please coordinate with these folks.

We're doing midcycle meetings all day here and Walt is out, but we have the BC and SPE working on this.
Len

Kriss,

I left you a voice mail explaining this request and wanted to followup with this e-mail.

Len,

I left a message with your secretary. This was one of several items I wanted to discuss with you--the others having to do with status of Oconee letter and heads up to Luis. If I don't hear back from you shortly, I'll write a separate e-mail.

Request:

Regarding the Oconee flood issue and 50.54(f) letter, through our numerous coordinations, we have gotten a question from Comm Svinicki regarding the engagement that has already occurred with the licensee on this issue. Because we are working very hard to have the call with licensee management on this letter and send them the final letter tomorrow, we need to get this response pulled together today.

What I am looking for is fairly concise bullets indicating any communication (verbal, written, through inspection) with the licensee on Jocassee Dam failure and issues with external flooding. I don't think there are very many and with Walt's background on the issue, I was hoping he could pull the regional piece of this together fairly quickly. We are pulling together the interactions at this end to combine with the regional bullets when received.

If Walt is not available, it seems to me there is another regional individual who also has extensive knowledge of the history of this issue--I apologize but I cannot remember his name.

Would it be possible to get something by 3 pm today?

Let me know if you have any questions. Thanks so much for your help.

Melanie
