Subject: Support Emergency Planning Petition

I wish to become a co-petitioner on the Petition for Rulemaking submitted February 15, 2012 by Public Citizen, Nuclear Information and Resource Service and 36 other organizations.

Look, I know, along with many others, very few nuclear plants undergo true updated cleaning and repairs. All they are doing is adding more and more pollution to our air. When the time comes and a nuclear plant causes a crisis, 10 mile emergency zone is idiotic! 50 miles is a minimum emergency zone. Plus all the radiation that is in the air is unbelievable!

This petition would make substantial and necessary improvements in the Nuclear Regulatory Commission's emergency planning regulations.

Please inform me when this petition is docketed for public comment. Thank you.

Sincerely,

Kelly Arellanes
