Joe,

We have reviewed the SE associated with BWROG-TP-00-023 and have no comments. Since we have no comments, do you require an official letter from the BWROG stating this or is this enough to get you to make the SE final. I'm assuming we would receive this final version and compile the "-A" document.

-Lucas

Lucas- Yes you may start the doom's day clock on the day you received the letter. Think of that as a target to shoot at. An e-version is attached. You'll be receiving an e-mail from my Branch Secretary also. I drafted the letter for the BWROG-TP-11-022 late last week and will start it through concurrence today. It will take a couple or three weeks to go through the process. Joe

Joe,

I just received today, a copy of the draft safety evaluation for BWROG-TP-11-023 (ME7650). The letter states that we have 20 working days to provide comments, but the letter is dated 11/2/12. Please validate for me that this time frame is flexible, or that we can at least have 20 working days from today to review and provide comments back to you. Also, can you please send me an electronic version of this draft SE to facilitate our review process?

Lastly, when should I receive the SE for BWROG-TP-11-022?

Best Regards,

Lucas Martins

Subject: P-T Topical Report Review Status

Lucas- the draft SEs have been transmitted to me from our tech reviewer Branch on both the P-T Limit Methodology and the Linear Elastic Fracture Mechanics Evaluation Topical Reports. I'll be processing them and sending you them (letter to Ted Schiffley) as expediently as I can.
