Attachments: DRAFT RAI 547 status.docx

Importance: High

See attached status update on RAI 547, Question 03.06.1-14. Based on highlighted text below, estimated date for all NRC feedback is 10/26. I would add a couple of days – perhaps to the end of October. I suggest providing a revised draft response date of 11/14/12 with a Final date of 12/14/12 (30 days since it is a 2nd Draft). Any thoughts or comments ?

Dennis

Amy please forward to AREVA my comments below, as well as the attachment that summarizes the current status staff comments on subject draft RAI response.

Based on telecon discussions held to date with AREVA, and on the feedback on specific COL I/Is that were provided in several e-mails, AREVA will need to provide an updated draft response to incorporate some of staff's comments. Also, there will be at least one more telecon to discuss Engineering Mechanics branch comments on several COL I/I's. I will schedule this telecon when EMB is prepared to provide the feedback. My current assessment is that AREVA will have received comments on all 26 proposed COL I/I changes by the end of next week in order to prepare a revised draft response.

One general comment - in the next draft response, instead of just providing a description of associated ITAAC wording revisions, AREVA should provide the reworded ITAAC itself for staff to review.
