Bill Borchardt
Executive Director of Operations
U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, MD 20852

Dear Executive Director Borchardt:

As two fellow Americans concerned with the health and safety of our countrymen, the safeguarding of our environment, and the conservation of our natural resources, we would like to thank you for your hard work and your commitment to making wise decisions that affect the lives of a diverse population.

One of the most urgent issues facing our communities, our states, and our nation is energy. After much research, we believe that solar and wind energy are the safest and cleanest sources of energy (both for us and for our planet), when compared to nuclear energy, coal, oil, natural gas, and geothermal power. In support of our viewpoint, we are enclosing a copy of a letter, as well as various attachments, that we sent to President Obama. Attachments 5-11 are the most relevant to your agency.

We hope that you will do everything in your power to study, support, and enforce legislation that protects our residents and is safe for our environment.

We appreciate your consideration of our recommendation.

Sincerely,

Patricia Alberts Robert Alberts
Patricia and Robert Alberts
