During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with the NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11. (Violations and Corrective Actions)			
10 CFR 20.1101(c) requires that the licensee periodically (at least annually) review the radiation safety program content and implementation.			
Contrary to the above, as of December 13, 2012, the licensee did not review the radiation protection program annually. Specifically, since the last inspection conducted in 2007, the licensee did not perform a periodic (at least annually) of the radiation safety program content and implementation.			
As corrective action, the RSO developed an audit plan using the guidance criteria of NUREG 1556, Vol 1, App.F, and conducted a comprehensive audit in December 2012.			
Statement of Corrective Actions			
I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.
