Meena:
Attached is a draft inspection outline (not quite a plan) based on the info the licensee sent previously. The first section (capability) is basically in-office prep; the second section (implementation) will be the on-site inspection. Let me know if there is anything additional you would like included in the plan.

Hi Curt,
Do you happen to have a draft inspection plan for the June 7th inspection that I can share with the hydrologists so that they could add their thoughts/insights to as necessary? Thanks, we should have some feedback to you by Friday, at the latest..thanks
