Advisory Council on Historic Preservation
Old Post Office Building
1100 Pennsylvania Avenue, NW Suite 803
Washington, DC 20004

SUBJECT: LIMERICK GENERATING STATION, UNITS 1 AND 2, LICENSE RENEWAL
APPLICATION REVIEW

Dear Mr. Nelson:

The U.S. Nuclear Regulatory Commission (NRC) is conducting an environmental review of the effects of renewing the operating license for Limerick Generation Station, Units 1 and 2 (LGS). LGS is located in Limerick Township, of Montgomery County, PA, and is operated by Exelon Generating Company, LLC (Exelon). As part of its review of the proposed action, the NRC has prepared a draft site-specific Supplemental Environmental Impact Statement (SEIS) to its "Generic Environmental Impact Statement for License Renewal of Nuclear Plants, NUREG-1437." The draft SEIS includes analyses of relevant environmental issues, including potential impacts to historic, archeological and cultural properties from extended operation and refurbishment activities associated with license renewal.

As stated in our September 16, 2011, letter to the Advisory Council on Historic Preservation, the NRC staff has determined that the area of potential effect (APE) for a license renewal action is the area at the power plant site and its immediate environs that may be impacted by post-license renewal land disturbing operation or projected refurbishment activities associated with the proposed action. The NRC views the APE for the LGS license renewal review as including the LGS site and the immediate environs.

In the context of the National Environmental Policy Act of 1969, under which the draft SEIS was prepared, the NRC staff preliminary determination is that the impact of license renewal on historical and archaeological resources is small and additional mitigation is not warranted. Under the provisions of the National Historic Preservation Act of 1966, the NRC staff's preliminary determination is that no historic properties will be affected by the proposed action.

In support of this conclusion, the NRC staff has conducted an environmental audit at the site and performed an independent analysis and review of historic and archaeological records. The NRC also contacted 15 Native American Tribes identified as having potential interest in the proposed undertaking. Three tribes—the Delaware Tribe of Indians, the Onondaga Nation, and the Stockbridge-Munsee Band of the Mohican Nation—responded to the NRC with scoping comments. These comments included requests for notification if historic and cultural resources of cultural significance were discovered on the LGS site and statements of no concern with the undertaking. Staff has taken the comments into consideration while preparing the draft SEIS. Appendix D of the draft SEIS contains copies of these letters.
