

No. 24 to Facility Operating License No. DPR-68, issued to Tennessee Valley Authority (the licensee), which revised Technical Specifications for operation of the Browns Ferry Nuclear Plant, Units Nos. 1, 2 and 3, located in Limestone County, Alabama. The amendments are effective as of date of issuance.

The amendments change the Technical Specifications and authorize the licensee to substitute a computational thermal model for in-situ temperature monitoring stations to determine compliance with the mixing zone temperature limits and the State of Alabama water temperature standards.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for these amendments and has concluded that an environmental impact statement for this particular action is not warranted because there will be no environmental impact attributable to the action other than that which has already been predicted and described in the Final Environmental Statement for the facility dated September 1, 1972.

For further details with respect to this action, see (1) the application for amendments dated January 5, 1979, (2) Amendment No. 52 to License No. DPR-33, Amendment No. 47 to License No. DPR-52, and Amendment No. 24 to License No. DPR-68, and (3) the Commission's related Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Athens Public Library, South and Forrest, Athens, Alabama 35611. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Md., this 15th day of August, 1979.

For the Nuclear Regulatory Commission,
Thomas A. Ippolito,
Chief, Operating Reactors Branch No. 3,
Division of Operating Reactors.

Regulatory Guide; Withdrawal of Regulatory Guide and Issuance of Technical Report

The Nuclear Regulatory Commission has withdrawn Regulatory Guide 1.104, "Overhead Crane Handling Systems for Nuclear Power Plants," which was issued for comment in February 1976. It was originally developed to describe the special features and safety devices that should be added to standard overhead crane systems to make them single-failure proof for use in reactor refueling and spent fuel handling operations. Since the guide was issued, there has been a change in the need for guidance on the single-failure-proof option for handling heavy loads over or near the spent fuel pool, and it was decided to withdraw the guide and publish the information it contained in a technical report. The report, NUREG-0554, "Single-Failure-Proof Cranes for Nuclear Power Plants," reflects the comments and suggestions received on the guide. NUREG-0554 is available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., or may be purchased at current rates from the National Technical Information Service, Springfield, Virginia 22161. (Paper copy: \$4.00; Microfiche: \$3.00)

Regulatory guides may be withdrawn when they are superseded by the Commission's regulations, when equivalent recommendations have been incorporated in applicable approved codes and standards, or when changes in methods and techniques or in the need for specific guidance have made them obsolete.

(5 U.S.C. 552(a).)

Dated at Rockville, Md., this 16th day of August 1979.

For the Nuclear Regulatory Commission,
Robert B. Minogue,
Director, Office of Standards Development.

POSTAL RATE COMMISSION

Visits to Postal Facilities

August 17, 1979.

Notice is hereby given that Chairman A. Lee Fritschler of the Postal Rate Commission will be visiting Postal Service Facilities on the dates indicated for the purpose of acquiring general background knowledge of postal operations.

Place of Visit and Date of Visit
Sherwood, Tilghman and Easton, Md.—
August 20, 1979

Easton, Md.; and Largo, Md. BMC—August 21, 1979
Rockville, Md.; and Northern Virginia SCF—
August 22, 1979
Baltimore, Md.—August 23, 1979

A report of the visits will be on file in the Commission's Docket Room

Cyril J. Pittack,
Acting Secretary.

DEPARTMENT OF STATE

[Public Notice CM-81216]

Advisory Committee on International Investment, Technology, and Development; Meeting

The Department of State will hold a meeting on September 26 of the Working Group on Transborder Data Flows of the Advisory Committee on International Investment, Technology, and Development. The Working Group will meet from 9:30-12:00. The meeting will be held in Room 1912 of the State Department, 2201 C Street, NW., Washington, D.C. 20520. The meeting will be open to the public.

The topic of discussion for the meeting will be the "OEDC Guidelines on Personal Data Protection in International Data Flows". The Working Group on Protection of Personal Data and the transmittal memorandum conveying to the OECD Council the Experts Group recommendations for the implementation of the Guidelines.

Requests for further information on the meeting should be directed to Richard Kauzlarich, Department of State, Office of Investment Affairs, Bureau of Economic and Business Affairs, Washington, D.C. 20520. He may
