

submitted to OMB for review, may be obtained from the Agency Clearance Officer. Comments on the items listed should be submitted to the Agency Clearance Officer and the OMB Reviewer.

DATE: Comments must be received in writing by March 21, 1985. If you anticipate commenting on a form but find that time to prepare will prevent you from submitting comments promptly, you should advise the OMB Reviewer and the Agency Clearance Officer of your intent as early as possible.

ADDRESS: Carl F. Steinmetz, NASA Agency Clearance Officer, Code NIM, NASA Headquarters, Washington, DC 20546; Kenneth Allen, Office of Information and Regulatory Affairs, OMB, Room 3235, New Executive Office Building, Washington, DC 20503.

FOR FURTHER INFORMATION CONTACT: Carl F. Steinmetz, NASA Agency Clearance Officer, (202) 453-2941.

Reports

Title: New Technology Transmittal.
OMB Number: 2700-0009.

Type of Request: Extension.

Frequency of Report: On occasion.

Type of Respondent: Businesses or other for-profit, federal agencies or other employees, non-profit institutions, small businesses or organizations.

Annual Responses: 2,000.

Annual Reporting Hours: 500.

Number of Forms: One.

Abstract-Needs/Uses: The NASA Form 666 is used to transmit information from a NASA contractor who has developed technological innovation under the contract which might be useful to others to the cognizant NASA official. Such reporting is required under the contract.

L.W. Vogel,

Director, Logistics Management and Information Programs Division.

BILLING CODE 7537-01-M

NUCLEAR REGULATORY COMMISSION

Draft Regulatory Guide; Withdrawal

Regulatory Guides 1.46, "Protection Against Pipe Whip Inside Containment,"

and 1.48, "Design Limits and Loading Combinations for Seismic Category I Fluid System Components," have been withdrawn.

Regulatory Guide 1.46 was issued in May 1973 to provide guidance for selecting the design locations and orientations of postulated breaks in fluid system piping. The July 1981 revision of Standard Review Plan 3.6.2, "Determination of Rupture Locations and Dynamic Effects Associated with the Postulated Rupture of Piping," provides more current information in this area.

Regulatory Guide 1.48 issued in May 1973 to delineate design limits and appropriate combinations of loadings for the design of Seismic Category I fluid system components. The July 1981 revision of Standard Review Plan 3.9.3, "ASME Code Class 1, 2, and 3 Components, Component Supports, and Core Support Structures," provides more current information in this area.

Therefore, Regulatory Guides 1.46 and 1.48 are being withdrawn. Withdrawal of these guides is in no way intended to alter any prior or existing licensing commitments based on their use.

Regulatory guides may be withdrawn when they are superseded by the Commission's regulations, when equivalent recommendations have been incorporated in applicable approved codes and standards, or when changes in methods and techniques or in the need for specific guidance have made them obsolete.

(5 U.S.C. 552(a))

Dated at Silver Spring, Maryland, this 4th day of March 1985.

For the Nuclear Regulatory Commission.

BILLING CODE 7590-01-M

Documents Containing Reporting or Recordkeeping Requirements; Office of Management and Budget Review

AGENCY: Nuclear Regulatory Commission.

ACTION: The Nuclear Regulatory Commission has recently submitted to the Office of Management and Budget (OMB) for review the following proposal for the collection of information under the provision of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

SUMMARY: 1. Type of submission, new, revision or extension: Revision.

2. The title of the information collection: Proposed Staff Actions to

Improve and Maintain Diesel Generator Reliability.

3. The form number, if applicable: Not applicable.

4. How often the collection is required: One time only.

5. Who will be required to ask to report: Licensees of operating nuclear power plants.

6. An estimate of the number of responses: 80.

7. An estimate of the total number of hours needed to complete the requirement or request: 12,800 hours.

8. An indication of whether Section 3504(h), Pub. L. 96-511 applies: Not applicable.

9. Abstract: The information is requested to ensure that the reliability of diesel generators is maintained at an acceptable level at the operating nuclear power plants.

ADDRESS: Copies of the submittal may be inspected or obtained for a fee from the NRC Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555.

FOR FURTHER INFORMATION CONTACT: Comments and questions should be directed to the OMB reviewer, Jefferson B. Hill, (202) 395-7340. NRC Clearance Officer is R. Stephen Scott, (301) 492-8585.

Dated at Bethesda, Maryland, this 5th day of March 1985.

For the Nuclear Regulatory Commission.

Patricia G. Norry,

Director, Office of Administration.

BILLING CODE 7590-01-M

[Docket Nos. 50-317 and 50-318]

Baltimore Gas and Electric Co.; Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Prior Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR-53 and DPR-69 issued to Baltimore Gas and Electric Company (the licensee), for operation of the Calvert Cliffs Nuclear Plant Unit Nos. 1 and 2 located to Calvert County, Maryland.

The amendments would revise provisions in the Technical Specifications (TS) to allow use of the 4-inch post-accident hydrogen purge line for containment purge during normal operation. The proposed TS revision is in accordance with the licensee's application for amendments dated December 22, 1983 and March 26, 1984.

Prior to issuance of the proposed license amendments, the Commission

will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

By April 10, 1985, the licensee may file a request for a hearing with respect to issuance of the amendments to the subject facility operating licenses and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written petition for leave to intervene. Request for a hearing and petitions for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) The nature of the petitioner's right under the Act to be made a party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than fifteen (15) days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter, and the bases for each contention set forth with reasonable specificity. Contentions shall
