

Mark II owners is under review by the staff and will be documented in a future NRC report. There are no operating BWR plants with Mark II containments in the United States.

Copies of the report will be available after September 1980. Copies will be sent directly to utilities, utility industry groups and associations and environmental and public interest groups. Other copies will be available for review at the NRC Public Document Room, 1717 H Street, NW, Washington, D.C.; and the Commission's local public document rooms located in the vicinity of existing nuclear power plants. Addresses of these local public document rooms can be obtained by contacting the Chief, Local Public Document Rooms Branch, Mail Stop 309, Nuclear Regulatory Commission, Washington, D.C. 20555; telephone (301) 492-7536. A single copy of NUREG-0588 will be provided free of charge, while the supply lasts, upon written request of a full participant in an ongoing NRC proceeding. This request must identify the requester as a participant and should be addressed to Director, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Dated at Bethesda, Md., the 3d day of September 1980.

For the Nuclear Regulatory Commission,
Frank Schroeder,
Acting Director, Division of Safety Technology, Office of Nuclear Reactor Regulation.

BILLING CODE 7590-01-M

Regulatory Guide; Withdrawal

The Nuclear Regulatory Commission has withdrawn Regulatory Guide 3.23, "Stabilization of Uranium-Thorium Milling Waste Retention Systems," that was issued in November 1974 to describe the principal stabilization, maintenance, and long-term control criteria that should be considered in connection with the construction and use of tailings retention systems at uranium and thorium mills containing radioactive materials in concentrations exceeding those specified in Appendix B of 10 CFR Part 20.

In amendments to 10 CFR Parts 30, 40, 70, and 150 that were published in the Federal Register on October 3, 1980 (45 FR 65521), the Commission has upgraded its requirements for uranium and thorium milling activities, including its requirements concerning tailings and wastes generated from these activities. These amendments take into account

the requirements mandated in the Uranium Mill Tailings Radiation Control Act of 1978, as amended, as well as other recent information on these milling activities. The guidance provided in Regulatory Guide 3.23 does not reflect these new requirements.

Regulatory guides are developed to describe and make available to the public methods acceptable to the NRC staff for implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems. Guides may be withdrawn when they are superseded by the Commission's regulations, when equivalent recommendations have been incorporated in applicable approved codes and standards, or when changes in methods and techniques or in the need for specific guidance have made them obsolete.

(5 U.S.C. 552(a))

Dated at Rockville, Md. this 22nd day of October 1980.

For the Nuclear Regulatory Commission,
Robert B. Minogue,

Director, Office of Standards Development.

Advisory Panel for the Decontamination of Three Mile Island, Unit 2

An Advisory Panel for the Decontamination of Three Mile Island, Unit 2, was established by the Nuclear Regulatory Commission of consult with and provide advice to the Commission on major activities required to accomplish expeditious and safe cleanup of the TMI-2 facility.

Notice is hereby given pursuant to the Federal Advisory Committee Act that the Advisory Panel will hold its first meeting on November 12, 1980, from 7:00 p.m.-10:00 p.m. at The Forum—Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania. The meeting will be open for public observation.

At this meeting the Panel will hold preliminary discussions to establish communications and to clarify the role of the panel and the scope of its activities.

Further information on the meeting may be obtained from Dr. William Travers, Three Mile Island Program Office, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, telephone 301/492-7811.

Dated: October 28, 1980.

John C. Hoyle,
Advisory Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

Agency Forms Under Review

October 27, 1980.

Background

When executive departments and agencies propose public use forms, reporting, or recordkeeping requirements, the Office of Management and Budget (OMB) reviews and acts on those requirements under the Federal Reports Act (44 USC, Chapter 35). Departments and agencies use a number of techniques including public hearings to consult with the public on significant reporting requirements before seeking OMB approval. OMB in carrying out its responsibility under the Act also considers comments on the forms and recordkeeping requirements that will affect the public.

List of Forms Under Review

Every Monday and Thursday OMB publishes a list of the agency forms received for review since the last was published. The list has all the entries for one agency together and grouped into new forms, revisions, extensions, or reinstatements. Some forms listed as revisions may only have a change in the number of respondents or a reestimate of the time needed to fill them out rather than any change to the content of the form. The agency clearance officer can tell you the nature of any particular revision you are interested in. Each entry contains the following information:

- The name and telephone number of the agency clearance officer (from whom a copy of the form and supporting documents is available);
- The office of the agency issuing this form;
- The title of the form;
- The agency form number, if applicable;
- How often the form must be filled out;
- Who will be required or asked to report;
- An estimate of the number of forms that will be filled out;
- An Estimate of the total number of hours needed to fill out the form; and
- The name and telephone number of the person or office responsible for OMB review.

Reporting or recordkeeping requirements that appear to raise no significant issues are approved
