

[Docket No. 50-445-CPA and ASLBP No. 86-528-02-CPA]

Texas Utilities Electric Co. et al. Comanche Peak Steam Electric Station, Unit 1; New Location for Special Prehearing Conference

March 31, 1986.

Before Administrative Judges: Peter B. Bloch, Chairman, Dr. Kenneth A. McCollom, Dr. Walter H. Jordan.

The Atomic Safety and Licensing Board will convene a Special Prehearing Conference at 9 a.m., April 22, 1986, at the Dallas Hilton (rather than the Fort Worth Hilton, as previously announced), 1914 Commerce Street, Dallas, Texas 75201.

The purpose of the Conference, which the public is welcome to observe, is to consider the arguments of the parties and petitioners concerning the granting of petitions to intervene and the admission of contentions concerning whether or not Texas Utilities Electric Company, *et al.* has shown good cause for the extension of its construction permit beyond August 1985.

For The Atomic Safety and Licensing Board.

Peter B. Bloch,

Chairman Administrative Judge.

Bethesda, Maryland.

BILLING CODE 7590-01-M

Regulatory Guides; Issuance and Availability

The Nuclear Regulatory Commission has issued a revision to a guide in its Regulatory Guide Series. This series has been developed to describe and make available to the public methods acceptable to the NRC staff of implementing specific parts of the Commission's regulations and, in some cases, to delineate techniques used by the staff in evaluating specific problems or postulated accidents and to provide guidance to applicants concerning certain of the information needed by the staff in its review of applications for permits and licenses.

Revision 2 to Regulatory Guide 3.4, "Nuclear Criticality Safety in Operations with Fissionable Materials at Fuels and Materials Facilities," describes procedures acceptable to the NRC staff for preventing accidental criticality in operations with fissionable materials and for validating calculational methods used in assessing nuclear criticality safety.

This revision endorses ANSI/ANS-8.1-1983, "Nuclear Criticality Safety in Operations with Fissionable Materials Outside Reactors," which is a consolidation of ANSI N16.1-1975/ANS-8.1 (endorsed by Revision 1 of Regulatory Guide 3.4) and ANSI N16.9-1975/ANS-8.11 (endorsed by Regulatory Guide 3.41). Therefore, Regulatory Guide 3.41 is being withdrawn. Withdrawal of Regulatory Guide 3.41, however, is in no way intended to alter any prior or existing licensing commitments based on its use.

Regulatory guides may be withdrawn when they are superseded by the Commission's regulations, when equivalent recommendations have been incorporated in applicable approved codes and standards, or when changes in methods and techniques or in the need for specific guidance have made them obsolete.

Comments and suggestions in connection with (1) items for inclusion in guides currently being developed or (2) improvements in all published guides are encouraged at any time. Written comments may be submitted to the Rules and Procedures Branch, Division of Rules and Records, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555.

Regulatory Guides are available for inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, DC. Copies of issued guides may be purchased from the Government Printing Office at the current GPO price. Information on current GPO prices may be obtained by contacting the Superintendent of Documents, U.S. Government Printing Office, Post Office Box 37082, Washington, DC 20013-7082, telephone (202) 275-2060 or (202) 275-2171. Issued guides may also be purchased from the National Technical Information Service on a standing order basis. Details on this service may be obtained by writing NTIS, 5285 Port Royal Road, Springfield, VA 22151.

(5 U.S.C. 552(a))

Dated at Silver Spring, Maryland, this 28th day of March 1986.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Nuclear Regulatory Research.
