All I remember of this is the preliminary set of simulations that they presented during a meeting at headquarters. Their latest submittal did include "snapshots" of various time intervals, but was not the entire analysis.

Neil and Rex, did we ever receive Duke's 2D flood inundation analysis results? I believe the answer is no?

Meena, in a conversation a couple of weeks ago you indicated that Duke submitted their 2D flood inundation analysis results for the Oconee site. I've looked through ADAMS but have not found this report. Could you send me a copy or point me in the right direction?

Thanks.

Jeff
