Subject: Jocassee/Oconee 2-D Report

Meena, the Wilson Engineering independent technical review (dated June 14, 2010) of the Jocassee/Oconee flooding issue references a report titled: "Oconee Nuclear Station, Jocassee 2-D Hydraulic Model Study, Hydraulic Modeling Report, Technical Report, April 2010." This report appears to fully document the Duke's the 2-D analysis efforts. Can we get a copy of this report so that we can fully understand the analysis and the consequences and risks to the Oconee reactors from a Jocassee Dam failure.

Thanks.

Jeff
