SUBJECT: MEETING SUMMARY FOR CATEGORY 3 PUBLIC MEETING CONCERNING  
THE CURRENT STATUS OF SAN ONOFRE NUCLEAR GENERATING STATION

Dear Mr. Dietrich:

On February 12, 2013, NRC personnel met with representatives of Southern California Edison and other public stakeholders at the Capo Beach Church located in Capistrano Beach, California. The meeting was held to present and discuss the NRC's current regulatory oversight status of San Onofre Nuclear Generating Station, including the status of its inspection and technical evaluation of Southern California Edison's October 3, 2012, response for Unit 2 to the March 27, 2012, NRC Confirmatory Action Letter.

During the meeting, the NRC heard from a number of stakeholders with a range of views. Views expressed by stakeholders in support of the facility included: the history of safe operation and working conditions and the need for electrical power and jobs provided by the plant. Views expressed by stakeholders in opposition of the plant included: demand for a public adjudicatory hearing before future operations, unacceptable high costs associated with repair or operation of the plant, lack of trust in the utility and/or the NRC, and various related environmental concerns.

There were a number of publicly elected officials at the meeting, with many expressing concerns about future operation of the plant because of the potential for radioactive releases and concerns about evacuation because of the large population. Several elected officials also requested public adjudicatory hearings. A number of chamber of commerce officials from various cities supported the plant and requested a fair process that would allow the plant to restart if the NRC determined it was safe.

The meeting was recorded and copies of the recorded video, as well as written transcripts of the meeting, will be made available on the NRC's website at <http://www.nrc.gov/info-finder/reactor/songs/tube-degradation.html>.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be available electronically for public inspection in the NRC's Public Document

Room or from the Publicly Available Records (PARS) component of the NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the Public Electronic Reading Room page of the NRC's public web site at [www.nrc.gov/reading-room/adams.html](http://www.nrc.gov/reading-room/adams.html).

Sincerely,
