ROSS IN-SITU RECOVERY PROJECT IN CROOK COUNTY, WYOMING,
SUPPLEMENT TO THE GENERIC ENVIRONMENTAL IMPACT STATEMENT
FOR IN-SITU LEACH URANIUM MILLING FACILITIES

Dear Mr. Bohl:

The U.S. Nuclear Regulatory Commission (NRC) staff is reviewing a source materials license application submitted by Strata Energy, Inc. (Strata), for the construction, operation, aquifer restoration, and decommissioning of the proposed Ross In-Situ Recovery (ISR) Project. The facility is proposed to be located in Crook County, Wyoming.

As part of the review of the application, the NRC staff has prepared a Draft Supplemental Environmental Impact Statement (SEIS) (NUREG-1910, Supplement 5). The Draft SEIS includes an analysis of relevant environmental issues, including potential impacts on historic and cultural resources, and documents the NRC staff's preliminary determination regarding the environmental impacts from the construction, operation, and decommissioning of the Ross Project.

Enclosed is a copy of the Draft SEIS for you to keep on your shelves. Please keep a copy of this Draft SEIS until at least one year from receipt of this letter. We appreciate your willingness to assist the public in participating in the environmental review process.
