ATTN: Document Control Desk
One White Flint North
11555 Rockville Pike
Rockville, MD 20852-2738

SUBJECT: NuScale Power, LLC Topical Report "Dynamical Scaling System (DSS) Methodology, Revision 2" (NRC Project No. 0769)

REFERENCE: 1) Letter from NuScale Power, LLC to the U.S. Nuclear Regulatory Commission, "NuScale Power, LLC Submittal of the Dynamical Scaling System (DSS) Methodology, Revision 2 (NRC Project No. 0769)," NP-LO-0712-1542, August 20, 2012

2) Letter from NRC to NuScale Power, LLC, ACCEPTANCE FOR REVIEW OF NUSCALE TOPICAL REPORT NP-TR-1010-867-P, REVISION 2, "DYNAMICAL SYSTEM SCALING METHODOLOGY" FOR DESIGN CERTIFICATION OF THE NUSCALE POWER REACTOR (TAC NO. RN6203)

NuScale Power, LLC, submitted the Dynamical Scaling System (DSS) Methodology topical report, Revision 2, for review by the U.S. Nuclear Regulatory Commission (NRC) in a letter on August 20, 2012 (Reference 1). NRC's acceptance of the topical report was noted in a letter dated January 28, 2013 (Reference 2). That letter outlined the schedule and scope of the NRC review.

Based on further discussion with NRC, NuScale has determined that this topical report should include a specific application of the scaling methodology for the NuScale Integral Scaled Test (NIST) facility so that a more efficient NRC review can be conducted. For that reason, NuScale requests NRC to postpone the start of the review until the additional information is provided. NuScale will provide the revised topical report submittal to the NRC in December 2013.

Please feel free to contact Steve Mirsky at (301) 770-0472 / smirsky@nuscalepower.com or me at 541-207-3931 / ewallace@nuscalepower.com if you have any questions.

Sincerely,

Edward G. Wallace
Vice President, Regulatory Affairs
