"NRC Request for Additional Information for RSO Amendments" letter dated
01MAR13

Dear Mr. Parker:

Mallinckrodt is providing this letter to the Nuclear Regulatory Commission (NRC) in response to your Request for Additional Information (RAI) for RSO amendments dated March 1, 2013.

To meet the request of CN579788, please find a revised organizational chart as Attachment I, depicting the position that has responsibility for the duties of Radiation Safety Officer (RSO). In addition the names of those currently holding positions have been provided on the chart for informational purposes. As we discussed, we will amend the license in the event that the organizational structure changes, but will not amend the license for changes in the personnel holding those positions (except for the individual assigned the duties of the RSO).

To meet the request of CN579790, please find an updated site organizational chart (Figure 7.1) as Attachment II, depicting the deletion of the Production Manager position and the additions of the Cold Products, Cyclotron Hot Products and Reactor Hot Products focus factory managers reporting to the site director.

To meet the request of CN579790, the following clarification statements have been provided. On 15JAN13, the position that was previously assigned the responsibilities of the Radiation Safety Officer (RSO) was eliminated due to a reduction in work force. The roles and responsibilities of the RSO were transferred to the position of Principal Health Physicist. There has been no elimination or changes in the roles and responsibilities of the RSO, only the position that is assigned that responsibility has changed.

Please, contact Gary Bosgraaf at 314-654-7661 or Tim Dowell at 314-654-7975 if you require additional information regarding this matter.

Sincerely,

A handwritten signature in black ink that reads "Dexter Evans". The signature is fluid and cursive, with a long, sweeping underline that extends to the right.

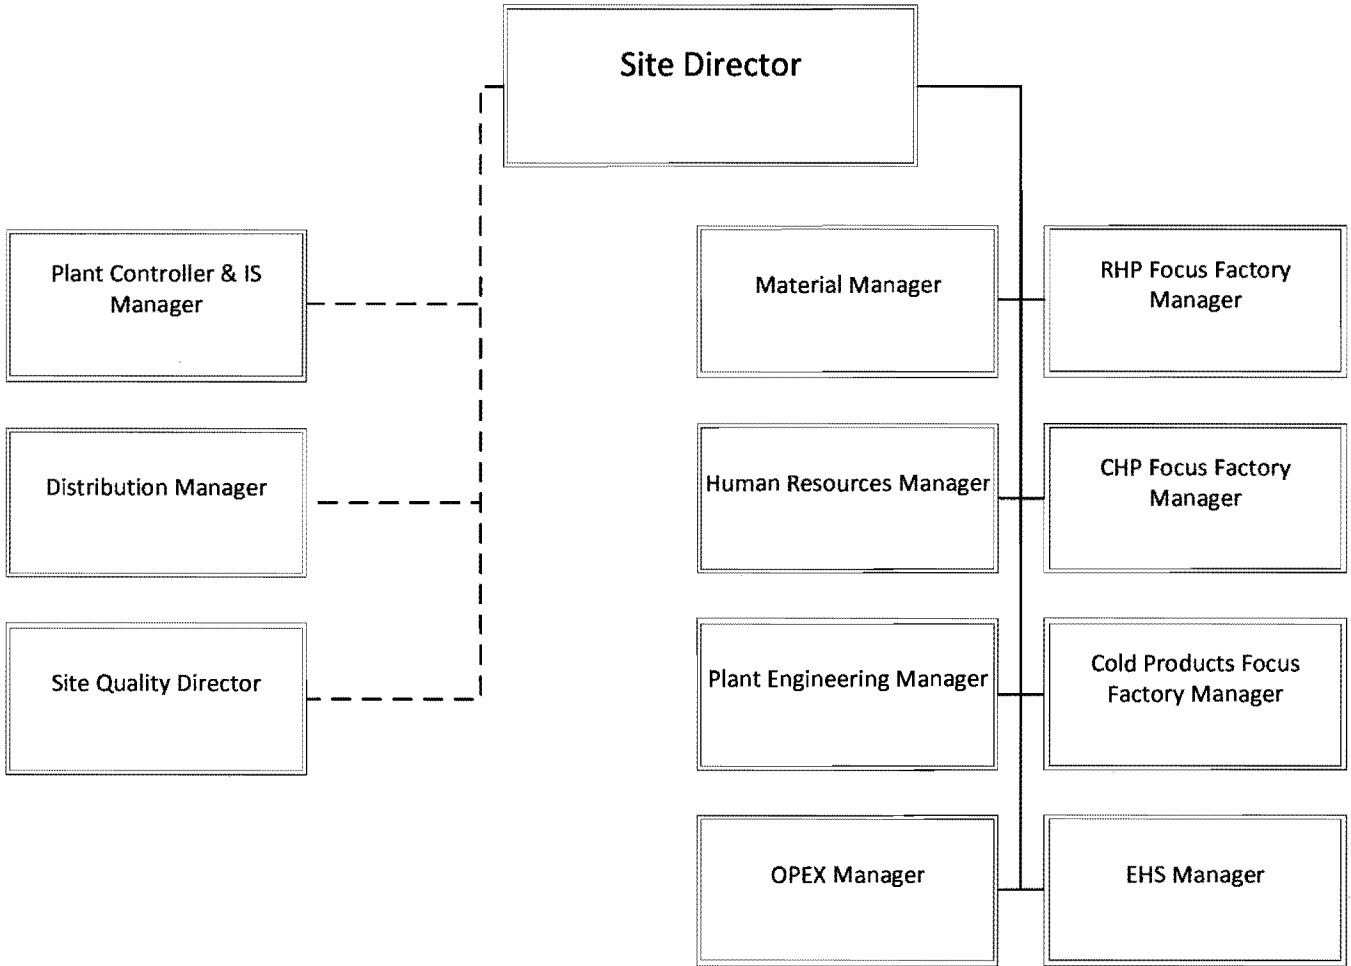

Dexter Evans
Senior Director Manufacturing
