Subject: Close GE Reactors -- NOW!

I understand that the NRC Commissioners soon will vote on whether or not to require filters and rupture discs on vents used to relieve pressure from containments in a severe accident in reactors designed and manufactured by General Electric.

These Mark I and Mark II reactors demonstrated their vulnerability to such accidents at Fukushima in March 2011. These reactors suffer from serious and fundamental design deficiencies, provide only a small amount of the nation's electricity, and should be permanently closed.

But nearly two years after Fukushima, the NRC has done NOT ONE DAMN THING to finally enhance the safety of these reactors!

A despicable case of reckless negligence, as bad as the crime of building reactors on earthquake-prone territory in the first place!

In a severe accident the amount of radioactivity released offsite from an unfiltered vent would be very large and damaging. It makes no sense not to add a filter to protect our families and property from contamination. Filtered systems are available, tested and in use today--for example in Sweden, Germany, France, Switzerland and will be installed in Japan.

We should not be so stupid as to have to learn the hard way, like Japan did.

I have friends in Japan who are directly affected by Fukushima's radioactivity ALL AROUND THEM AND THEIR CHILDREN! They are MAD ENOUGH TO KILL THE PEOPLE AT TEPCO AND THEIR GOVERNMENTAL "LEADERS", all of whom LIED and DENIED the obvious dangers, no matter what concerns were voiced by the people in the communities surrounding Japan's reactors.

As part of the Fukushima Lessons Learned Task Force, the NRC Staff recommended filtering. But thinking only of their fucking PROFITS, the nuclear industry has been lying & lobbying shamelessly against this common-sense measure, concerned more with the size of its bank accounts than public safety -- may they and all who support them rot in hell forever, on behalf of my contaminated friends and their doomed children!

I demand that the NRC Commissioners FINALLY GET OFF THEIR ASSES AND ACT to permanently close these dangerous reactors as quickly as possible. In the interim, the Commissioners MUST require installation of filtered vent systems. NO IFS AND OR BUTS.

Thank you.
