VIRGINIA ELECTRIC AND POWER COMPANY
NORTH ANNA POWER STATION UNITS 1 AND 2
FLOOD HAZARD REEVALUTION REPORT IN RESPONSE
TO MARCH 12, 2012 INFORMATION REQUEST REGARDING FLOODING ASPECTS OF
RECOMMENDATION 2.1

On March 12, 2012, the Nuclear Regulatory Commission (NRC) issued, "Request for Information Pursuant to Title 10 of the Code of Federal Regulations 50.54(f) Regarding Recommendations 2.1, 2.3, and 9.3, of the Near-Term Task Force Review of Insights from the Fukushima Dai-ichi Accident," to all power reactor licensees and holders of construction permits in active or deferred status. Flooding Recommendation 2.1 requires licensees to perform a flood hazard reevaluation and provide a final report documenting the results, as well as pertinent site information and detailed analysis.

For Flooding Recommendation 2.1, Enclosure 2 of the letter states that in accordance with the NRC's prioritization plan, within 1-3 years from the date of the information request, submit the Hazard Reevaluation Report and include the interim action plan. In a letter dated May 11, 2012, the NRC issued their prioritization plan. The response date for North Anna Power Station (NAPS) Units 1 and 2 flood hazard reevaluation was identified as March 12, 2013, which corresponds to one year from the date of the March 12, 2012 Information Request.

Attachment 1 provides the NAPS Flooding Hazard Reevaluation Report. Attachment 2 provides the NAPS Initial Assessment of the Flooding Hazard Reevaluation Results and Interim Actions Plan.

If you have any questions regarding this information, please contact Mr. Thomas Shaub at (804) 273-2763.

Sincerely,

Eugene S. Grecheck
