Dear Ms. Kotzalas:

Industrial Nuclear Company, Inc.

This letter is a follow up to my email from January 18, 2013. I have not yet received a reply.

IRSC, Inc.

We hereby request a regulatory opinion on the following questions. We request that these questions be reviewed by the NRC legal office, and that we receive a written reply on NRC letterhead.

Metso Automation USA, Inc.

Morpho Detection, Inc.

Is it necessary for a service provider to be listed on a sealed source and device registration in order to service that product? If so, are there any distinctions to this requirement in regards to the device being approved for use under a specific license device, general license or exemption? Please provide any regulation or regulatory guide reference which supports your reply.

QSA Global, Inc.

Rapiscan Systems

RMD, Inc.

We understand that a specific license is required by the NRC or an Agreement State in order to service devices containing radioactive sources, and that it is common practice for secondary (subcontract) manufacturers of devices to be listed on SS&D's in addition to the primary manufacturer/distributor.

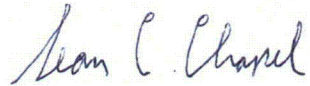

Source Production and Equipment

We were recently informed by Bruce Carrico of the NRC that it is a requirement that service providers be listed on the SS&D, however it does not seem to make a lot of sense from a practical point of view. Often times competitors are licensed to service

each other's products, but it would be impractical to be listed on each other's device registration.

Please send me confirmation that you have received this letter. If you have any questions please call me at 781.767.2176 or email me at schapel@irsc-inc.com.

Sincerely,

A handwritten signature in blue ink that reads "Sean C. Chapel". The signature is written in a cursive style with a large initial 'S'.

Sean C. Chapel,
