Thanks Lori. I will talk to my branch chief to see if there are any issues, but that should be fine. Good luck.

Huda

Huda,

After I sent this response last Friday the Engineer came to me and said that it could take them till the end of April to get this revised drawing complete for me to send to you. I realize this is not optimal but we are in a staffing shortage at the moment which is making it take a bit longer for internal support on drawings than usual. Please let me know if it will be acceptable in case it takes us till the end of April to get this drawing to you. I apologize for the inconvenience.

Lori

That should be doable. Thanks Huda.

Thanks, Lori. If you could get it to me within a month I would appreciate it. Do you think that is doable?

Huda,

We need to re-draw the descriptive in solidworks as our Engineering department changed systems a few years back. We are also a bit strapped for staff time at the moment. I am hoping to get something in to you in the next couple weeks. I am assuming that this submission is

considered under timely filed status so even if it takes a few days after the expiration at the end of this month we will still be able to transport the package domestically until the renewal is completed. I hope this works into your schedule. Please let me know if this is a problem. Many thanks,

Lori

Lori,

Any status update on the revised note?

Thanks,

Huda

Lori,

As discussed in our teleconference on February 12, 2013, please update Note 2 on Drawing No. R77090, Rev. D to specify the codes and standards to be used on weld repairs.

Please contact me with any questions.

Thanks,

Huda Akhavannik
