MAR 09 2013

Jennifer Walton, Ph.D.
Radiation Safety Officer
Central Michigan University
Risk Management, Environmental,
Health and Safety
Smith 103
Mt. Pleasant, MI 48859

Dear Dr. Walton:

Enclosed is Amendment No. 35 to your NRC Material License No. 21-01432-02 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

This also refers to the telephone discussion between you and me on March 4, 2013, concerning the bounding (by stating the lowest and highest atomic numbers for these materials) needed at this time for materials authorized under Subitem No. 6HH. of the license.

In your letter dated March 6, 2013, you indicated that the researcher you need to consult with about this matter is unavailable but that you expect to be able to submit this information to us by approximately April 3, 2013.

Please submit this information to my attention as "additional information to control number 579631," to facilitate proper handling in our offices. Only one complete copy is needed and should be submitted, that should also be currently dated and signed by a senior management representative. Your assistance in this matter is greatly appreciated.

In your letter dated March 6, 2013, you requested the deletion of a particular room in the Cart Building, as no licensed materials had ever been possessed, used or stored in this room. This room is now considered released for unrestricted use. The deletion of this room has been completed at this time and it has been replaced on your license, as requested, in accordance with your application dated December 18, 2012, and your letter dated March 6, 2013.

~~Official Use Only - Security-Related Information~~

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

J. Walton

If you have any further questions concerning this amendment please contact me at (630) 829-9841 and my fax number is (630) 515-1078. My email address is colleen.casey@nrc.gov.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system.

Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/req-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

A copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you.

This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions.

Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture.

You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

~~Official Use Only - Security-Related Information~~

J. Walton

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

A handwritten signature in cursive script that reads "Colleen Carol Casey".
