COMMONWEALTH OF VIRGINIA DEPARTMENT OF HEALTH

RADIOACTIVE MATERIALS LICENSE

Under the Code of Virginia Section 32.1-229.3 and 12VAC5-481, Virginia Radiation Protection Regulations, and in reliance on statements and representations made by the licensee, a license is issued authorizing the licensee to receive, acquire, possess and transfer radioactive material designated below; to use the material for the purpose(s) and at the place(s) designated below; and to deliver or transfer the material to persons authorized to receive it in accordance with 12VAC5-481, Virginia Radiation Protection Regulations. This license is subject to all applicable rules and orders of the Virginia Department of Health now or hereafter in effect, and to any conditions specified below.

I. Hurt and Proffit	e Name and Address	2013 3. L. is he 4. A	3 icense No: ereby renewed in mendment No.:	2

<u>CONDITIONS</u>

10. Licensed material shall be used and stored at the licensee's facilities located at 2524 Langhome Road, Lynchburg, Virginia, 350 South 4th Street. Suite D. Wytheville, Virginia, 584 Thorntons Mill Road, Red House Virginia and may be used at temporary job sites of the licensee anywhere in Virginia where VDH maintains jurisdiction for regulating the use of licensed material.

	License Number: 680-346-1	
RADIOACTIVE MATERIALS LICENSE	Amendment No: 2	

- 11. The Radiation Safety Officer for this license is Sharon L. Hise.
- 12. Licensed material shall only be used by, or under the supervision and in the physical presence of, individuals who have received the training described in the application dated February 27, 2013, have been instructed in licensee's operating and emergency procedures and approved in writing by the Radiation Safety Officer.
- 13. The licensee is authorized to transport licensed material in accordance with the provisions of Chapter 481, Part XIII, 'Transportation of Radioactive Material.'
- 14. Sealed sources containing licensed material shall not be opened or removed from their source holders by the licensee.
- 15. The licensee shall conduct a physical inventory every 6 months, or at other intervals approved by the agency, to account for all sealed sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory, and shall include the radionuclides, quantities, manufacturer's name and model numbers, location, individual performing inventory and the date of the inventory.
- 16. The licensee shall maintain a utilization log where the portable gauge(s) are stored. The log shall contain the datc(s) of usc, temporary job site(s), serial number of the gauge, and the name(s) of the authorized user(s). Records of the utilization log shall be maintained for 5 years.
- 17. Any cleaning, maintenance, or repair of a gauge that requires detaching the source or source rod from the gauge shall be performed only by the manufacturer or by other persons specifically licensed by VDH, the NRC or another Agreement State to perform such services.
- 18. A. If the licensee uses unshielded sealed sources extended more that 3 feet below the surface, the licensee shall use surface casing that extends from the lowest depth to 12 inches above the surface and other appropriate procedures to reduce the probability of the source or probe becoming lodged below the surface. If it is not feasible to extend the casing 12 inches above the surface, the licensees hall implement procedures to ensure that the cased hole is free of obstruction before making measurements.
 - B. If a scaled source or a probe containing sealed sources becomes lodged below the surface and it becomes apparent that efforts to recover the sealed source or probe may not be successful, the licensee shall notify the agency and submit the report required by 12VAC5-481-1110. The licensee shall not abandon the sealed source or probe without obtaining the agency's prior written consent.
- 19. In addition to the possession limits in Item 8, the licensee shall further restrict the possession of licensed material to quantities below the minimum limit specified in 12VAC5-481-450 C for establishing decommissioning financial assurance.
