Subject: Draft License Condition

Gentlemen:

Below is a draft of a revised LC 10.12. I will contact you Monday to let you know whether or not this will be the final version.

If land application is utilized, the licensee will implement a preoperational and operational sampling plan, as discussed in Section 6.0 of the licensee's Groundwater Discharge Plan and per the conditions in its Groundwater Discharge Plan permit issued by the South Dakota Department of Environment and Natural Resources, until principal activities at the land application areas cease. In addition, the licensee shall install a minimum three wells around each pond area, Dewey and Burdock, with two wells installed topographically downgradient and one well installed topographically upgradient of the pond areas. Monitoring wells installed to comply with the licensee's Groundwater Discharge Plan may be incorporated into this monitoring network.

Regards,

Stephen J. Cohen
