Dear Chairman MacFarlane,

Please require vents on the Pilgrim type reactors. We all remember Three Mile, Chernoble and Fukushima where no one thought an accident would happen but they did. There will be another nuclear accident and it's just a matter of when and where. Please don't have happen that on your watch.

Representative Paul Tonko said it best at the House Energy & Commerce subcommittee hearing yesterday. "To the public, there is no such thing as a small nuclear accident."

Sincerely

Edward T. Russell
