

March 21, 2013

Mr. Billy Cox  
Electric Power Research Institute  
45 Railroad Avenue  
Seabrook, NH 03874

Dear Mr. Cox:

Thank you for speaking at the U.S. Nuclear Regulatory Commission's (NRC) 25<sup>th</sup> Annual Regulatory Information Conference (RIC). Your presentation on "Quantifying the Phantom Four" during Technical Session W18, "Advances in Low-Level Waste Guidance: How Uniform is Your Uniform Manifest," provided important information on improvements in management and disposal of low-level waste in the United States. The interest of the attendees was evident by the range of questions we received during the question-and-answer period following the panel presentations. I personally heard many favorable comments about our session afterwards.

Audio and video files for the Opening session, Commission plenary sessions, Regional Administrators' session and Special Plenary Session are now available at <http://video.nrc.gov/>. All final presentation slides, audio recordings and questions that were not addressed during the technical sessions are being compiled and will be posted within the next few weeks on the RIC public website at: <http://www.nrc.gov/public-involve/conference-symposia/ric/index.html>.

As indicated by the initial feedback we've received, this year's RIC was successful in achieving its goals of dispersing information, fueling thought and providing a venue for discussion on topics pertinent to nuclear regulation and the nuclear industry. It is your commitment and support that helped to make the RIC a success.

Again, thank you for your participation at NRC's 2013 Regulatory Information Conference.

Warm regards,

*/RA/*

Aby Mohseni, Deputy Director  
Environmental Protection  
and Performance Assessment Directorate  
Division of Waste Management  
and Environment Protection  
Office of Federal and State Materials  
and Environmental Management Programs
