Subject: NUCLEAR REGULATORY COMMISSION REQUIREMENTS FOR COOLING COMANCHE PEAK REACTORS
Attachments: Water Inventory Requirement for Comanche Peak Safety.docx
Importance: High

Dear Judge Cockerham and Mayor Hulett,

In response to your request, I am providing the attached file that states what inventory of water the NRC requires for providing the safe shutdown and cool down of the Comanche Peak Nuclear Power Plant Units. I hope the attached is responsive to what you needed from us.

In the event you or the other interested parties still have questions about the requirements for maintaining the safety of the Comanche Peak reactors, I would be pleased to arrange a meeting with our technical staff to discuss the issue and answer those questions.

Please feel free to call me at the number below if there is need for further discussion.

Sincerely,

Bill Maier
