RE: Amend NRC License No. 47-17517-02

Dear Sirs:

Please add this request to our previous request which you received under your mail confirmation #580206. We are requesting three changes to our current license.

- 1) Increase maximum possession limit to four gauges. All gauges will be Troxler Model 3430 with sealed sources Cs-137 and Am-241:Be.
- 2) Add a second storage location at 1127 Short Creek Road, Wheeling, WV. This is one of our more permanent job locations.
- 3) Make Mr. Mike Neely our new Radiation Safety Officer. Mr. Neely is a WV Registered Professional Engineer and has successfully completed the Troxler Training Course on October 20, 2012.

Please expedite these changes as we inadvertently exceeded our license possession limit and are out of compliance.

Please let me know if more information is needed or if this is sufficient.

Sincerely,

Robert E. Leigh
