---

Guy,

By letter dated September 9, 2011, Entergy Operations, Inc. (Entergy), the licensee for Grand Gulf Nuclear Station (GGNS) Unit 1, requested changes to the facility operating license, technical specification, and licensing basis as necessary to change the spent fuel pool storage requirements.

The NRC staff will perform an audit of the CSA calculations on April 3 and 4, 2013 at the GENF facility in Wilmington, North Carolina. We will issue an audit summary and, if necessary, any further request for additional information within 30 days following the audit exit. Attached is the propose agenda. Also as discussed with Guy Davant, a call maybe necessary to discuss the Chemical Engineering Branch's request for additional information at a later date.

Alan Wang
