Subject: RE: KI Replenishment for California

Good Morning Mr. Potter,

Sorry I haven't responded sooner, I was out of the office last week. We are currently working on replenishing KI that expires in **2014**. My records indicate that California received a total 203,300 tablets (expiring 12/2014) and also 1,358,032 tablets (260,200 tablets expire 12/2014). The remaining 1,097,840 tablets expire in 2015. We are currently working on getting a contract in place to purchase tablets. At this time we are unable to promise additional tablets due to population increases. Please feel free to send your request for the total amount of tablets that you would like to receive. If something in the future changes, we will let you know if it would be possible to send additional tablets.

Please let me know if you have any additional questions.

Thank you,
Annette Stang

Annette

We have started looking at the numbers and we are coming up with some major discrepancies.

We have approximately 1.3 million tablets at the SONGS site which you do not mention in your original email. Could you take another look at what was supplied to California to our Orange County site. We received two shipments from lot numbers TU905A and TU902C at Orange County.

Our records indicate that we received in 65mg tablets by site:
DCPP – 203,300
SONGS – 1,358,040

Additionally California purchased 200,000 65mg tablets to cover the greater than 10 mile EPZ at DCP. We also purchased 50,008 135mg tablets for state workers and institutionalized populations.

I would like to confirm these numbers with you to ensure there are no discrepancies before we make our official request. Please call or email and let us know what you have found out.

Hi Mr. Potter,

At this time we are unable to promise additional tablets due to population increases. I would go ahead and send your request for the total amount of tablets that you would like to receive. If something in the future changes, we will let you know if it would be possible to send additional tablets.

Thank you,
Annette Stang

Annette

Thank you for the reminder. We will send in our replenishment request as soon as we examine the stockpile numbers and ensure they are adequate for our populations.

Thanks again

Hello,

The NRC is preparing to replenish expiring stockpiles of KI tablets. According to our records your State has 203,300 (65mg) tablets with lot numbers TU902B expiring in December 2014 and 260,200 (65mg) tablets with lot numbers TU902C expiring in December 2014. The NRC will replace the expiring stockpiles during fiscal year 2014. If your State wishes to participate in the NRC KI tablet replenishment, please respond with the delivery address, point of contact (including phone number) and any special delivery requests you have no later than May 31, 2013. Please note these tablets will not be shipped until 2014 to ensure timely replacement of your States expiring KI stockpiles. We will notify you prior to shipment of the tablets to enable you to make any preparations necessary for receipt of the shipment.

Thank you so much for your prompt attention to this matter. I look forward to your response. Please let me know if you have any questions.

Thank you,
Annette Stang
