**Subject:** RE: Information and Reporting - Aged Out Devices Containing Radioactive Material - Tritium

Good afternoon Linda,

Thank you for your prompt response and sharing the background information related to the USCG's return of used aircraft tritium exit signs to Self-Powered Lighting (SPL), Berwyn, PA 19312.

SPL has confirmed that USCG's 30 used tritium exit signs were shipped to Shield Source Incorporated (SSI), Peterborough, ON, Canada, for disposal.

No further information or actions is required from USCG on this topic.

V/R'

Subject: Information and Reporting - Aged Out Devices Containing Radioactive Material - Tritium

Mr. Bhachu,

Please note the correction in the subject line to reflect that these exit signs which contain tritium were "aged out" and not damaged.

These signs were over 26 years old and were all replaced.

The exit signs that were removed were not damaged in any way.

Best regards,

Linda D. Clark, Contracting Officer

Subject: Information and Reporting - Damaged Devices Containing Radioactive Material - Tritium

Mr. Bhachu,

Attached you will find the information I spoke to you about on the phone earlier today.

Due to a change in personnel and record data base systems I cannot confirm that a response to the attached demand letter was made.

On 25 Nov 09 a purchase order was issued to Self Powered Lighting, Inc, 31 Waterloo Avenue, Berwyn, PA 19312-1730 for the disposal of 30 Exit Signs containing radioactive material called tritium.

The company believes they are exempt from requirements of the NRC regulations on this particular purchase order. The following statement was provided by Self Powered.

Statement from Self Powered Lightening:

I will try to briefly explain the situation here:

1) The contract requires copies of proof of disposal reports submitted to the United States Nuclear Regulatory Commission (USNRC).

a. The materials were not shipped to a US licensed facility, therefore there is no NRC report required by a US licensed facility.

b. Further, the aircraft signs that USCG returned are licensed under 31.7 of the US regulations. However, only products licensed under 31.5 of the US regulations require reporting to the USNRC. So if the signs would have been shipped to a US licensed facility, which they were not, there would still be no reporting requirement to USNRC.

2) The signs were exported by USCG to a Canadian licensed facility. That facility is regulated by Canadian law, not US law. We can obtain verification from that facility that the signs returned under the USCG contract were properly scrapped and disposed of in accordance with Canadian regulation.

End of Statement

Please tell me if this information is sufficient for the NRC requirements and I will close this file. If it is not, I will be happy to obtain any needed information you may have.

Best regards,

Linda D. Clark, Contracting Officer

USCG ALC/MRS Contracting

**Subject:** FW: Forwarding Inquiry for FSME response call: Tritium Exit Sign transfer & Disposal, U.S. Coast Guard

**Importance:** High

Angela, Ujagar,

Not sure which of you will want to handle this so forwarding to both of you to figure out between you: Ujagar since GL lead, or Angela since you sent the DFI. They are located in NC. I understand from Chris there is some history with our interactions with Coast Guard on the DFI?

Michele

**Subject:** Forwarding Inquiry for FSME response call: Tritium Exit Sign transfer & Disposal, U.S. Coast Guard  
**Importance:** High

Hi,

OE just received a phone call from Linda Clark of the U.S. Coast Guard in North Carolina (252) 334-5212. She referred to the DFI from Cindi Carpenter regarding tritium exit signs. They are phasing out aircraft and have a contractor who transferred their tritium exit signs from their aircraft to Canada for disposal of the tritium. She is particularly concerned the she does not have any paperwork to demonstrate transfer and disposal and wants to know what it needed. The aircraft are 35 years old.

I referred her to FSME and gave her your number, but asked that I first send you an e-mail to make you aware and give you an opportunity to work with other staff as may be needed. She requested that someone in FSME call her back. She knows that you are out on Friday and Monday.

Sue

## Expired Sign Return Policy – Self Luminous Aircraft

---

The following outlines SPL's return policy for self-luminous aircraft signs and parts:

**RETURN OF  
SELF-LUMINOUS  
AIRCRAFT SIGNS &  
PLACARDS**

SPL will accept any self-luminous aircraft exit sign or placard regulated by 10 CFR 31.7 for the standard return fee of \$35.00 USD per sign.

**RETURN OF EXPIRED  
T-LIGHT™  
COMPARATORS**

SPL will accept expired or un-needed T-Light™ comparator units manufactured by SPL for the standard return fee of \$35.00 USD per unit.

- REQUIREMENTS:**
1. Payment in Advance is required.  
(Purchase orders and credit card payments need pre-approval.)
  2. A unique "Return Material Authorization Number" is required for each return shipment.

Contact SPL for all replacements and returns: 800-777-9399

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

EA-09-001

May 11, 2009

Certain Holders of General Material Licenses  
as listed in Attachment 1

SUBJECT: DEMAND FOR INFORMATION AND REPORTING DAMAGED DEVICES  
CONTAINING RADIOACTIVE MATERIAL

The U.S. Nuclear Regulatory Commission (NRC) records indicate that your organization possesses devices containing low levels of radioactive material. The radioactive material is called tritium, and it is contained within exit signs your organization acquired. NRC regulates the tritium contained within these signs. Therefore, when you obtained these signs, you became a "general licensee" of the NRC.

Although the tritium contained within these exit signs does not present a hazard when the signs are used in accordance with the manufacturer's instructions, NRC regulations nevertheless require that licensees keep certain records related to these signs. These signs should be properly accounted for at all times, and properly disposed, so that members of the public are not needlessly exposed to the low-level radiation within them. To help ensure that general licensees possessing tritium exit signs are complying with NRC regulations intended to protect public health and safety, the NRC is requiring that you respond to the enclosed Demand for Information.<sup>1</sup> The Demand for Information requires that you provide the NRC with information regarding any tritium exit signs you acquired, but which are now lost, stolen, or missing.

The NRC also requires that, if you find any tritium exit sign is damaged, you immediately suspend operation of the sign and report the damaged sign to the NRC within 30 days. This is required by the NRC's regulation at section 31.5(c)(5) in Title 10 of the Code of Federal Regulations (10 CFR 31.5(c)(5)). In addition, if it appears that damage to the sign may have resulted in tritium being released, the NRC's regulation at 10 CFR 20.2201(a)(1)(i) requires that you make a telephone report immediately after it becomes known to you that tritium is missing.

To make a telephone report of a damaged sign, please follow these instructions. For signs located in states where NRC regulations apply directly; for signs in U.S. Possessions and Territories; and for signs possessed by Federal entities, call the NRC Operations Center at 1-800-532-3469. For signs located within Agreement States (35 states that have signed agreements with the NRC to independently regulate the use of radioactive materials) the reports should be made to the appropriate state contact. An attachment (Attachment 2) to this letter explains which states are Agreement States and lists the contact information for each state.

The NRC's regulation at 10 CFR 20.2201(a)(1)(i) also requires that you make a telephone report to the NRC immediately after it becomes known to you that any tritium exit sign is lost,

---

<sup>1</sup> The NRC previously mailed the attached Demand for Information to United States Coast Guard (USCG) headquarters on January 16, 2009. NRC records show that the Demand for Information was received at USCG headquarters on January 19, 2009. To date, however, the NRC has not received a response to the Demand for Information.

report to the NRC immediately after it becomes known to you that any tritium exit sign is lost, stolen, or missing. In this case, however, the NRC will consider you to be in compliance with these requirements if you provide a complete response to the attached Demand for Information within the allotted timeframe. The NRC will consider your response to satisfy regulatory requirements because the Demand for Information seeks the same type of information required by 10 CFR 20.2201(a)(1)(i), and because allowing you to provide the required information in your response, rather than in a telephone report, is not expected to have any adverse effect on public health and safety. The NRC would reiterate, however, that if you find any damaged signs that may have released tritium, you must make a telephone report to the NRC immediately.

If you have any questions, please refer to the point of contact on the Demand for Information. The enclosed Demand for Information has been forwarded to the Office of the Federal Register for publication.

Sincerely,

/RA/  
Cynthia A. Carpenter, Director  
Office of Enforcement

Enclosure: Demand for Information
