Attention: Mr. John Jankovich

Reference: Device Registration No. NR-1195-D-104-S

Dear Mr. Jankovich:

SABIA has designed a new model elemental analyzer, which is slightly different from previous models, in that the overall housing is designed to be mounted, surrounding a slurry pipe. In other aspects, the design of source housing, shielding and materials of construction are similar to the SABIA model X1 materials analyzer.

I am requesting that this device be added to the existing device registration, NR-1195-D-104-S. Please contact me with any questions.

Thank you for your prompt attention to this matter.

Sincerely,

James F. Miller, R.S.O.
