**SUBJECT: REPORT OF IMPINGEMENT OF ATLANTIC STURGEON
SALEM GENERATING STATION UNIT NO. 1
DOCKET NO. 50-272**

The Nuclear Environmental Event Report, "Report of Impingement of Atlantic Sturgeon" is being submitted pursuant to the requirements of Section 5.4.2 of Appendix B, Environmental Protection Plan, to the Operating License for the Salem Generating Station, PSEG Nuclear LLC (PSEG).

Please find enclosed a letter and two attachments with further information regarding this impingement event.

If you have any questions or require additional information, please do not hesitate to contact Jeffrey Pantazes, Manager – Nuclear Environmental Affairs at (856) 339-7900.

Sincerely,

A handwritten signature in black ink, appearing to read "L. M. Wagner".

REPORT OF IMPINGEMENT OF ATLANTIC STURGEON

In accordance with Section 5.4.2 of Appendix B, Environmental Protection Plan, to the Operating License for the Salem Generating Station, PSEG Nuclear LLC (PSEG) hereby transmits notification of a nonroutine event, and documents the occurrence and removal of an Atlantic sturgeon (*Acipenser oxyrinchus*) from the Salem Generating Station circulating water intake structure trash bars.

Consultation pursuant to Section 7 of the Endangered Species Act of 1973 (ESA) between NRC and the National Marine Fisheries Service (NMFS) on the effects of the operation of Salem Station on threatened and endangered species has been ongoing since 1979. The most recent revision to the Biological Opinion and Incidental Take Statement issued in January 1999 exempts the specified annual take of shortnose sturgeon and sea turtles. In advance of relicensing for Salem Station, consultation pursuant to Section 7 of the ESA between NRC and NMFS was reinitiated in 2009. On April 6, 2012, the NMFS listed five Distinct Population Segments of Atlantic sturgeon as threatened or endangered under the ESA. In May 2012, NRC requested consultation on the effects of the continued operation of Salem Station on Atlantic sturgeon. The NMFS issued a draft Biological Opinion and Incidental Take Statement (ITS) in July 2012 that, when finalized, will authorize a specified incidental take of both Atlantic sturgeon and shortnose sturgeon associated with operation of the Salem Station circulating water intake system.

Pursuant to Section 5.4.2 of the Environmental Protection Plan for Salem Station, nonroutine events which require reporting to other federal agencies shall be reported in accordance with the other agencies' reporting requirements. Accordingly, enclosed please find two (2) attachments. Attachment 1 provides the information requested by the NMFS in Appendix II to the current ITS and in Appendix B, Part 2, to the revised draft ITS. Attachment 2 is a copy of a Sturgeon Salvage Form verbally requested by the NMFS.

There are no commitments contained in this letter.

STURGEON SALVAGE FORM

For use in documenting dead sturgeon in the wild under ESA permit no. 1614 (version 07-20-2009)

INVESTIGATORS'S CONTACT INFORMATION

Name: First James Last Carll
 Agency Affiliation Environmental Consulting Services, Inc. (ECSI)
 Email James.Carll@pseg.com
 Address P.O. Box 236 M/C H18 Hancocks Bridge NJ, 08038
 Area code/Phone number (302) 378-9881 ext. 205

UNIQUE IDENTIFIER (Assigned by NMFS)

Abr090012011NJ

DATE REPORTED:

Month 03 Day 20 Year 2013

DATE EXAMINED:

Month 03 Day 20 Year 2013

SPECIES: (check one)

- shortnose sturgeon
 Atlantic sturgeon
 Unidentified *Acipenser* species
 Check "Unidentified" if uncertain.

LOCATION FOUND:

Offshore (Atlantic or Gulf beach) Inshore (bay, river, sound, inlet, etc)
 River/Body of Water Delaware River City Hancocks Bridge State NJ
 Descriptive location (be specific) Removed from Circulating Water Intake Structure (CWIS), intake bay 11A, during routine trash rack cleaning at the Salem Generating Station, PSEG Nuclear LLC.

Latitude 39° 27'38.17 N (Dec. Degrees) Longitude 75° 32'10.08 W (Dec. Degrees)

CARCASS CONDITION at time examined: (check one)

- 1 = Fresh dead
 2 = Moderately decomposed
 3 = Severely decomposed
 4 = Dried carcass
 5 = Skeletal, scutes & cartilage

SEX:

- Undetermined
 Female Male
 How was sex determined?
 Necropsy
 Eggs/milt present when pressed
 Borescope

MEASUREMENTS:

Fork length 660 mm
 Total length 742 mm
 Length actual estimate
 Mouth width (inside lips, see reverse side) _____ cm / in
 Interorbital width (see reverse side) _____ cm / in
 Weight actual estimate not weighed kg

TAGS PRESENT? Examined for external tags including fin clips? Yes No Scanned for PIT tags? Yes No

Tag #	Tag Type	Location of tag on carcass

CARCASS DISPOSITION: (check one or more)

- 1 = Left where found
 2 = Buried
 3 = Collected for necropsy/salvage
 4 = Frozen for later examination
 5 = Other (describe) Specimen collected alive and released back to the Delaware River through the Detritus Discharge Pipe (DDP).

Carcass Necropsied?

Yes No
 Date Necropsied: _____
 Necropsy Lead: _____

PHOTODOCUMENTATION:

Photos/video taken? Yes No
 Disposition of Photos/Video: _____

SAMPLES COLLECTED? Yes No

Sample	How preserved	Disposition (person, affiliation, use)

Comments: The live Atlantic sturgeon was collected from the Salem Circulating Water Intake Structure, during routine trash rack cleaning on March 20, 2013 at 08:59. Length measurements and an inspection for external and PIT tags was made. No tags were found. The fish was released back to the Delaware River at 09:05 via the Salem Generating Station Circulating Water Intake System Detritus Discharge Pipe.

ATTACHMENT 1 (Sturgeon)

Observer's full name: James Carll

Reporter's full name: James Carll

Species Identification (Key attached): Atlantic sturgeon (Acipenser oxyrinchus)

Site of Impingement (Unit 1 or 2, CWS or DWS, Bay #, etc.): CWIS, Bay 11A

Date animal observed: 3/20/13 Time animal observed: 08:59

Date animal collected: 3/20/13 Time animal collected: 08:59

Date rehab facility contacted: N/A Time rehab facility contacted: N/A

Date animal picked up: N/A Time animal picked up: N/A

Environmental conditions at time of observation (i.e., tidal stage, weather):

Tidal stage- 90 ft (Ebb tide)

Date and time of last inspection of screen: 3/20/13 @ 05:10

Water temperature (°C) at site and time of observation: 5.5 degrees Celsius

Number of pumps operating at time of observation: Unit 1 5 Unit 2 6

Average percent of power generating capacity achieved per unit at time of observation:

Unit 1 100 Unit 2 100

Average percent of power generating capacity achieved per unit over the 48 hours previous to observation:

Unit 1 100 Unit 2 100

Sturgeon Information:

Species Atlantic sturgeon (Acipenser oxyrinchus)

Fork length (or total length) 742 mm (total length) Weight not weighed

Condition of specimen/description of animal

The Atlantic sturgeon was alive, but in a damaged condition when found. A large laceration to the posterior portion of the tail, just prior to the caudal fin was observed.

Fish Decomposed: NO SLIGHTLY MODERATELY SEVERELY

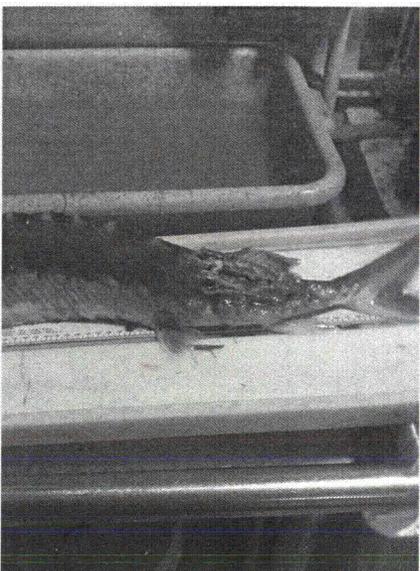

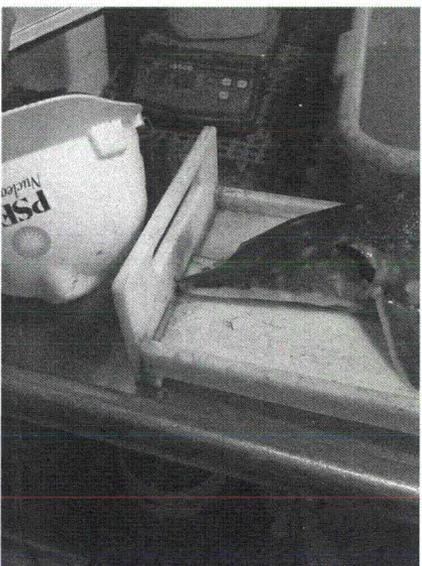

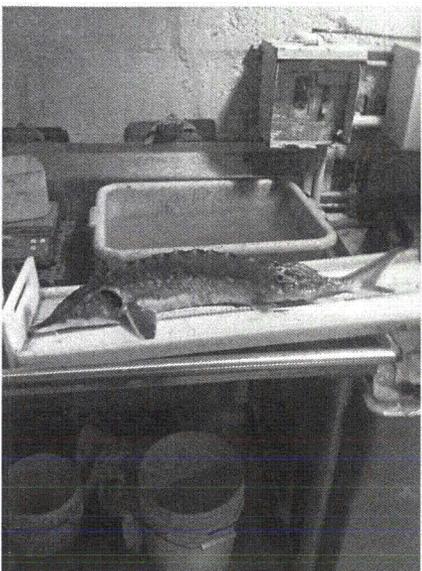

Fish tagged: YES NO Please record all tag numbers. Tag # _____

Photograph attached: YES / NO

(please label species, date, geographic site and vessel name on back of photograph)

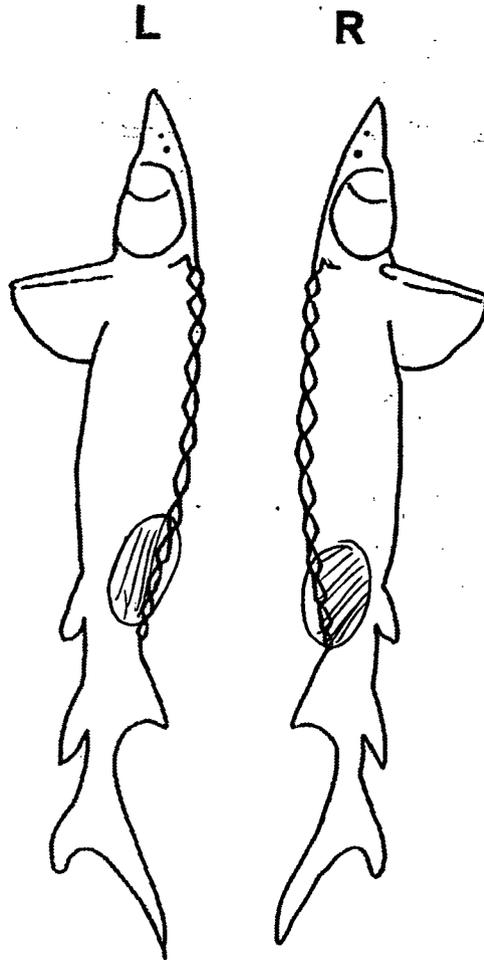

ATTACHMENT 1 (Sturgeon) continued

Photographs (if available)

ATTACHMENT 1 (Sturgeon) continued

Draw wounds, abnormalities, tag locations on diagram and briefly describe below

Description of fish condition:

The Atlantic sturgeon was alive when found. A large abrasion to the posterior portion of the tail was observed.
