**Subject:** Consideration of Special Nuclear Materials License - Docket 70-7025

Dear Ms. Diaz,

RPI is requesting that the license application for Docket 70-7025 be reviewed, but that the final issuance of the license be held to a future date. The funding to perform the transfer of fuel and the experiments covered under this license application is currently in doubt do to the budget sequester. By delaying the issuance of the license, RPI and NRC are saved the administrative burden of executing the license conditions when no material is in possession and no work is being done. RPI will inform you in writing at such time that the necessary funding is assured. Meanwhile, if there are any addition questions or requests for additional information regarding the application, please forward them to me and we will respond.

Thank you for your consideration,

Peter F. Caracappa, Ph.D., CHP
