**SUBJECT: DRESDEN NUCLEAR POWER STATION – NOTIFICATION OF NRC
INSPECTION**

Dear Mr. Pacilio:

In a telephone conversation on April 8, 2013, Mr. R. K. Walton, of Operator Licensing Branch, and Ms. P. O'Brien, of Regulatory Affairs, made arrangements for the U. S. Nuclear Regulatory Commission (NRC) to conduct an inspection using Temporary Instruction (TI) 186, "Inspection of Procedures and Processes for Responding to Potential Aircraft Threats," at Dresden Nuclear Power Station. Additionally, the NRC will conduct a partial 71111.11B requalification inspection (problem identification and resolution of licensed operator issues). This inspection is planned for the week of May 13, 2013.

The NRC inspector will require a shift manager qualified individual, qualified unit supervisors and a qualified security shift supervisor for a table topic scenario to allow inspection of TI 186 attributes. Additionally, in order to minimize the impact to your on-site resources and to ensure a productive inspection for both sides, please have available the procedures that would be followed when responding to an aircraft threat and any related lesson plans pertinent to the inspection. Additionally, the inspector needs to review your aircraft threat procedure and a list of corrective action reports regarding licensed operator issues, the week before the inspection.

This letter does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget, Control Number 3150-0011. The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget Control Number.
