Washington, D.C. 20036

Dear Mr. Ayres:

Friends of the Earth's (FOE's) petition addressed to the U.S. Nuclear Regulatory Commission (NRC), dated June 18, 2012 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML12171A409), has been referred to me pursuant to Section 2.206 of Title 10 of the *Code of Federal Regulations* (10 CFR) of the Commission's regulations. FOE supplemented its petition on November 16, 2012 (ADAMS Accession No. ML12325A748), and February 6, 2013 (ADAMS Accession No. ML13109A075). The Petition Review Board (PRB) will also consider the safety significance and complexity of information you submitted on April 4, 2013 (ADAMS Accession No. ML13116A266 and ML13116A267), and determine if the information should be consolidated with the existing petition or if it will be treated as a new petition. FOE requests that the NRC order Southern California Edison (SCE) to submit a license amendment application for the design and installation of the San Onofre Nuclear Generating Station, Units 2 and 3, replacement steam generators. FOE also requests that the NRC suspend SCE's licenses until they are amended. In short, as the basis for the petition request, FOE states that SCE violated 10 CFR 50.59 when it replaced its steam generators in 2010 and 2011 without first obtaining NRC approval of the design changes via a license amendment.

I would like to express my appreciation for FOE's effort in bringing these matters to the attention of the NRC. I have assigned Brian Benney, of my staff, to serve as the petition manager for the petition. You can reach Mr. Benney at 301-415-2767.

You met with our PRB on January 16, 2013, to discuss FOE's petition. Subsequently, FOE supplemented its petition on February 6, 2013. On February 12, 2013 (ADAMS Accession No. ML13116A265), FOE requested that Mitsubishi Heavy Industries' Report entitled *Root Cause Analysis Report for tube wear identified in the Unit 2 and Unit 3 Steam Generators at San Onofre Generating Station* and other specified documents be considered in the PRB's evaluation of the petition.

The petition manager initially informed you of the PRB's recommendation to accept the petition for review on April 9, 2013. The petition is under review by a team comprised of individuals from several divisions within the Office of Nuclear Reactor Regulation.

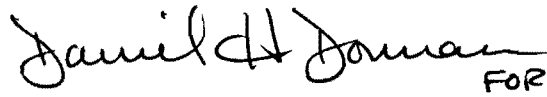

Enclosed for your information is a copy of the notice that the NRC will file with the Office of the Federal Register for publication. I also refer you to the brochure, NUREG/BR-0200, Revision 5, "Public Petition Process," issued February 2003 (ADAMS Accession No. ML050900248).
