#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is issuing a revision to an existing guide in the agency’s “Regulatory Guide” series. This series was developed to describe and make available to the public information such as methods that are acceptable to the NRC staff for implementing specific parts of the agency’s regulations, techniques that the staff uses in evaluating specific problems or postulated accidents, and data that the staff needs in its review of applications for permits and licenses.

Revision 1 of Regulatory Guide 1.141, “Containment Isolation Provisions for Fluid Systems,” was issued with a temporary identification as Draft Regulatory Guide, DG–1213. RG 1.141 describes updated methods that the NRC staff considers acceptable for use in complying with the Commission’s requirements for containment isolation of fluid systems. Title 10, of the Code of Federal Regulations, Part 50, “Domestic Licensing of Production and Utilization Facilities”, Appendix A, “General Design Criteria for Nuclear Power Plants,” General Design Criteria 54, 55, 56, and 57 establishes that piping systems that penetrate the primary reactor containment be provided with isolation capabilities that reflect the importance to safety of isolating these piping systems.

##### II. Further Information

In June 2009, DG–1213 was published with a public comment period of 60 days from the issuance of the guide. The public comment period closed on August 29, 2009. The staff received no public comments. The regulatory analysis may be found through the NRC’s Agencywide Documents Access and Management System (ADAMS) under Accession No. ML101870472.

## NUCLEAR REGULATORY COMMISSION

[NRC-2010-0257]

### Withdrawal of Regulatory Guide 5.17

**AGENCY:** Nuclear Regulatory Commission.

**ACTION:** Withdrawal of Regulatory Guide 5.17, "Truck Identification Markings".

#### FOR FURTHER INFORMATION CONTACT:

Robert G. Carpenter, Regulatory Guide Development Branch, Division of Engineering, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, telephone: 301-251-7483 or e-mail [Robert.Carpenter@nrc.gov](mailto:Robert.Carpenter@nrc.gov).

#### SUPPLEMENTARY INFORMATION:

##### I. Introduction

The U.S. Nuclear Regulatory Commission (NRC) is withdrawing Regulatory Guide 5.17, "Truck Identification Markings," published in January 1974. Regulatory Guide 5.17 identifies methods acceptable to the NRC staff for complying with the former NRC regulation, 10 CFR 73.31(e) (1973), "Shipment By Road," with regard to markings applied to a road vehicle to enhance its identification from the air.

Specifically, former § 73.31(e) required that vehicles used to transport quantities of special nuclear material by

road be marked on top with identifying letters or numbers which will permit identification of the vehicles under daylight conditions from the air in clear weather at 1,000 feet above ground level. Regulatory Guide 5.17 is no longer needed because the guidance is outdated. Former § 73.31(e) has been deleted (44 FR 68184; November 28, 1979) and the information is now contained in the Department of Transportation (DOT) regulations 49 CFR parts 172 through 180. These DOT regulations specify the shape, color, material, markings, and display locations for all types of hazardous material placards, including radioactive materials. The regulation is prescriptive by nature and these DOT regulations are routinely updated; therefore, reproducing the requirements in a regulatory guide is unnecessarily redundant and could lead to frequently outdated guidance.

##### II. Further Information

The withdrawal of Regulatory Guide 5.17 does not alter any prior or existing licensing commitments based on its use. The guidance provided in this regulatory guide is no longer necessary. Regulatory guides may be withdrawn when their guidance is superseded by congressional action or otherwise no longer provides useful information.

Regulatory guides are available for inspection or downloading through the NRC's public Web site under "Regulatory Guides" in the NRC's Electronic Reading Room at <http://www.nrc.gov/reading-rm/doc-collections/>. Regulatory guides are also available for inspection at the NRC's Public Document Room (PDR), Room O-1 F21, One White Flint North, 11555 Rockville Pike, Rockville, Maryland 20852-2738. The PDR's mailing address is US NRC PDR, Washington, DC 20555-0001. You can reach the staff by telephone at 301-415-4737 or 800-397-4209, by fax at 301-415-3548, and by e-mail to [pdr.resource@nrc.gov](mailto:pdr.resource@nrc.gov).

Regulatory guides are not copyrighted, and NRC approval is not required to reproduce them.
