If the process your proposing is OK with JLD and my boss, then that's what we'll do. I had the chance to put in my two cents, but it's not up to me. My perspective is that NEI said that EPRI is doing work for them, and that they were going to provide the results for our review. I think we should review the analyses assumptions and results internally and get alignment before talking to industry.

I didn't know about the contacts with EPRI. I didn't know about the latest variation you've referred to..

Thanks for the dialog. I need to check with the JLD folks and Bill. I'll abide by their counsel.

Bob:

NRR's lead. If you don't want them discussed, they won't be. Kathy thought the SOARCA stuff might add value if the subject came up during the discussion, and I was conveying my understanding of how you, Bill, and Kathy left it.

News to me, Mike. I have a problem with all of them. I'm leaving it to the managers to sort out.

Bob:

Kathy sent an email that the agreement was we would bring Ed's materials to the meeting and that he would present them if the flow of the discussion led to that being appropriate. I agree that we would not go in with anything formal. I suggest you look at his slides and identify if there is anything specific that you would not want shared.

Importance: High

Ed,

Your management and my management decided it would be inappropriate for you to brief EPRI before you briefed and got alignment on the results with NRR and JLD. Therefore, I believe RES will not make a presentation at this time. Thanks.

Bob et al,

Here are my draft slides. I would appreciate any comments.
