

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

May 15, 2013

Mr. Thomas D. Gatlin  
Vice President, Nuclear Operations  
South Carolina Electric & Gas Company  
Virgil C. Summer Nuclear Station  
Post Office Box 88, Mail Code 800  
Jenkinsville, SC 29065

SUBJECT: VIRGIL C. SUMMER NUCLEAR STATION, UNIT 1 – SUPPLEMENTAL  
INFORMATION NEEDED FOR ACCEPTANCE OF REQUESTED LICENSING  
ACTION CONCERNING TECHNICAL SPECIFICATION TASK FORCE  
TRAVELER -510 (TAC NO. MF1384) (RC-13-0047)

Dear Mr. Gatlin:

By letter dated April 2, 2013, South Carolina Electric & Gas Company (SCE&G) submitted a license amendment request for Virgil C. Summer Nuclear Station, Unit 1 (VCSNS). The proposed amendment would modify the Technical Specification (TS) requirements regarding steam generator (SG) tube inspections and reporting as describe in Technical Specification Task Force (TSTF) 510, "Revision to Steam Generator Program Inspection Frequencies and Tube Sample Selection," Revision 2. The purpose of this letter is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of this amendment request. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

Consistent with Section 50.90 of Title 10 of the *Code of Federal Regulations* (10 CFR), an amendment to the license (including the technical specifications) must fully describe the changes requested, and following as far as applicable, the form prescribed for original applications. Section 50.34 of 10 CFR addresses the content of technical information required. This section stipulates that the submittal address the design and operating characteristics, unusual or novel design features, and principal safety considerations.

The NRC staff has reviewed your application and concluded that additional information is necessary to enable the staff to make an independent assessment regarding the acceptability of the proposed amendment/relief request in terms of regulatory requirements and the protection of public health and safety and the environment. Specifically, the NRC staff is looking for plant specific confirmation of the SG tube material type, the applicability of the related General Design Criteria (GDC) 14, 15, 30, 31, and 32 in Appendix A 10 CFR 50, provide a discussion on which SG tube alloy(s) type material is installed at VCNS, and confirmation regarding adoption and implementation of TSTF-449, "Steam Generator Tube Integrity."

T. Gatlin

- 2 -

In order to make the application complete, the NRC staff requests that SCE&G supplement the application to address the information requested in the enclosure by May 15, 2013. This will enable the NRC staff to begin its detailed technical review. If the information responsive to the NRC staff's request is not received by the above date, the application will not be accepted for review pursuant to 10 CFR 2.101, and the NRC will cease its review activities associated with the application. If the application is subsequently accepted for review, you will be advised of any further information needed to support the staff's detailed technical review by separate correspondence. If you have any questions, please contact the Ms. Eva Brown, at (301) 415-2315.

Sincerely,

*/RA/*
